Gayashi Gomez

Subject: Accounting System and Costing

File: Gayashi Gomez_Report (1).pdf

Total Score

60 / 120 **(50%)**

Performance Summary

Strengths	The student demonstrated a strong understanding of trial balance preparation and profit calculation for specific events. They also showed good knowledge in explaining accounting terms like overhead allocation and apportionment, and accurately prepared the Provision for Unrealised Profit Account.
Weaknesses	Significant weaknesses were observed in preparing the Income and Expenditure Account, particularly in correctly identifying and calculating all expenditure items. The student also struggled with the Trade Receivables Ledger Control Account, making errors in postings and balancing figures.
Improvements	The student needs to focus on comprehensive account preparation, ensuring all relevant items are included and calculations are accurate. Developing analytical and evaluative skills for financial positions and accounting methods is crucial, as several evaluative questions were left unattempted.
Comments	A good effort was made on the computational aspects of some questions. Consistent practice in full account preparation and developing critical thinking for evaluative questions will lead to substantial improvement.

Question Breakdown

Q	Score	Status	Feedback
3(a)	9/9	CORRECT	All entries in the trial balance were correctly classified and the final debit and credit totals balanced accurately.
3(b)	5/5	CORRECT	The calculation of profit for the dance was entirely correct, with all income and expenditure items accurately identified and summed.
3(c)	8/10	PARTIAL	Most income and expenditure items were correctly calculated and posted, including subscriptions, profit on dance, disposal profit, donations, telephone charges, equipment repair, and depreciation. However, rent payable was omitted and sundry expenses were incorrectly calculated, leading to an incorrect total expenditure and final surplus.
3(d)	0/6	UNATTEMPTED	This evaluative question was not attempted.

Q	Score	Status	Feedback
4(a)	1/4	PARTIAL	Only 'To detect errors' was a correct reason for preparing control accounts. Other reasons provided were either incorrect or vaguely related to the outcomes of control accounts rather than their primary purpose.
4(b)	8/10	PARTIAL	Several debit and credit entries were correctly posted, including opening debit balance, credit sales, dishonoured cheque, interest charged, sales returns, discount allowed, contra, and irrecoverable debts. However, the opening credit balance was incorrectly placed, the figure for receipts from customers was incorrect, and consequently, the closing balances were inaccurate.
4(c)	0/3	INCORRECT	The extract from the Statement of Financial Position was incorrect. Trade receivables, irrecoverable debt, and bank figures were misclassified or used incorrect values, leading to an inaccurate total.
4(d)	2/7	INCORRECT	The opening balance and one dishonoured cheque entry were correct. However, there were multiple errors in posting other transactions, including incorrect classification of bank payments/receipts and purchases, and an incorrect value for irrecoverable debts.
4(e)	0/6	UNATTEMPTED	This evaluative question was not attempted.
5(a)	4/4	CORRECT	Both overhead allocation and overhead apportionment were explained accurately and concisely, demonstrating a clear understanding of these concepts.
5(b)(i)	13/16	PARTIAL	Most individual raw material, direct labor, direct expense, and overhead figures were correctly identified and posted. However, significant errors occurred in summing these figures to arrive at Prime Cost, Total Overheads, Cost of Production, Profit on Manufacture, and Transfer to Trading Account.
5(b)(ii)	4/4	CORRECT	The Provision for Unrealised Profit Account was accurately prepared, including the opening balance, income statement adjustment, and closing balance, supported by correct working.
5(c)	6/6	PARTIAL	The student identified several valid potential benefits and drawbacks of the proposed bonus scheme, such as increased productivity, efficiency, worker skills, increased costs, demotivation of high performers, and potential conflicts. While the conclusion was positive, the overall evaluation could have been more balanced with a clearer decision and rationale.
6(a)	0/6	UNATTEMPTED	This question on accounting concepts and conventions was not attempted.
6(b)	0/4	UNATTEMPTED	This calculation question for total depreciation charge was not attempted.
6(c)(i)	0/4	UNATTEMPTED	This question to prepare the Equipment Account was not attempted.
6(c)(ii)	0/3	UNATTEMPTED	This question to prepare the Equipment - Provision for Depreciation Account was not attempted.
6(c)(iii)	0/4	UNATTEMPTED	This question to prepare the Disposal Account was not attempted.
6(d)	0/3	UNATTEMPTED	This question on the disadvantages of the revaluation method was not attempted.
6(e)	0/6	UNATTEMPTED	This evaluative question on the straight-line depreciation method was not attempted.
